## Make Training a Priority

When it comes to training, everyone has an excuse for why they don't have time for it. For some, training has always taken a back seat in your business.

Did you know that 99% of computer problems are simply a **PEBMAC** – the **P**roblem **E**xists **B**etween **M**onitor **A**nd **C**hair? In other words, each of us are the problem because we lack understanding and the proper skills.

No matter what size your shop was yesterday, is today or is going to be tomorrow, providing the necessary training to adjust to changes must be a higher priority than it was in the past. It may very well be that the **PEBMAC** in your shop isn't your employees, but your failure to provide training on updated processes, products and equipment.

*Words To Live By*

*Go the extra mile. It's never crowded there.*

## We're Here to the Help!

**Auto Body Supply** is committed to making every project a success. Our trained automotive, fleet and commercial coatings specialists will partner with you to give advice and recommend the perfect products for your job.
