Quick, Easy and Mobile! That is our **COLORMOBILE** Application

Did you know that PPG's *ColorMobile* software gives you *daily* updates for the latest color formulas? That's right -primes, variants and special field color formulations are all updated *daily*! You don't have to wait for the next PAINTMANAGER® software update or CD to retrieve the latest color formulations. Access these from any cellphone, tablet or desktop - 24/7 - from wherever you are using the *ColorMobile* application!

The *ColorMobile* application offers many benefits. Here are just a few:

- Searches down to the year, make, and model level
- Quick and easy preference changes like unit of measure or weight
- Ounce level quantities with minimum mix warnings
- Full formula details including VOC and Limited Use Toner information
- Color Box location information
- Print functionality via label or paper

If you haven't registered for this amazing tool, go to www.colormobile.com and register today! It's **FREE!!**

POLISHING SYSTEM

The innovative BigFoot random orbital polishing system designed and developed by RUPES is a revolutionary method for reducing traditional polishing times without creating holograms on any part of the painted surface. The process is completely new and allows excellent results to be obtained in just one step, creating substantial savings in time, energy consumption and cost of consumable products. The BigFoot system is based on a large diameter random orbital movement. The long throw eliminates holograms and takes away the necessity for a secondary removal step of them, an operation that is generally necessary when traditional rotary polishing systems are used. The BigFoot system is the perfect solution of the novice user or the professional in search of a flawless finish. BigFoot's design characteristics make it unique in the world of polishers. The exceptional balance and lack of vibration afford the operator complete control and maximize the maneuverability of the tool during the polishing operation. Ask your **ABS** rep for more information.
