**Did You Know That**

PPG is the world's #1 producer of transportation coatings - approximately 70% of cars are protected by PPG products.

Our new computer software system is up and running and we are getting more comfortable with it every day.

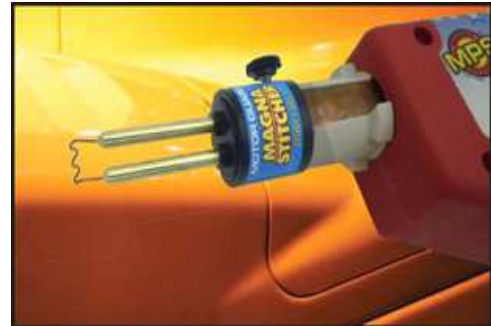

We also thought this would be a good time to make a change to our billing cycle, instead of the the billing month to end on the 26<sup>th</sup> we will go to a more normal 1<sup>st</sup> to the last day of the month.

We also think it will be helpful for your record keeping.

If you have any questions please give us a call.

Thank you for your continued patience during this transition.

**NEW PRODUCT**

**MOTOR GUARD  
 MAGNA STICHER**

***Do Plastic Repair with Your Stud Welder***

The NEW Motor Guard Magna Sticher™ turns your stud welder into a plastic repair tool. The MS-1 fits all popular stud welders and provides all the features of a plastic repair system at a fraction of the cost.

Reinforces broken components by inserting super strong, stainless steel stakes which stitch the part together prior to further repairs which may include plastic welding, filling and refinishing.

Use the Magna Sticher to repair all thermoplastic parts including bumpers, fascias, headlamp housings, spoilers and more!

**Booth and Air Line Filters**

Do you know when you inspected or replaced the filters for your paint booth or air lines? It is one item that gets put on the back burner till "next week". Be proactive and have a replacement schedule posted as a reminder, don't wait till there is a fish eye or moisture problem.

If you have any question on purchasing the proper filters check with one of the staff at **Auto Body Supply.**
