SPEEDY Surface Deluxe Prep Pads

The next generation of surface preparation. Use for speedy removal of surface contaminants such as rail dust and paint over spray.

Easy to clean, just rinse off with water – even if you drop it on the ground.

- Lasts up to 10 times longer than clay bars
- For a flawless “show room perfect” shine
- Glides on & off easily for a slick finish

Auto Body Supply

Will be closed on
Monday, May 25th

Here for Our Customers

In response to the COVID-19 pandemic, we have taken extensive measures to safeguard our staff, customers and supply chain, ensuring our store remains open, clean and stocked.

Many companies and government officials have shared with us their valuable insights, and we learned that being proactive in our decision making has helped us keep our business open safely and continue to do our part to flatten the curve.

We continue to be here to serve our customers and ask that you do not hesitate to contact us with any questions or needs.

The *Forgotten Link* to a Clean Paint Job

When most of us think about a clean paint job we think of filters, clean floor and a clean painter. What we do not think about is the hoses. Many factors determine hose life such as heat in the booth, oil or water contamination and physical damage (we all run over them). So inspect your hoses weekly. Also if you are not using high flow couplers and nipples you are restricting your air flow. So inspect you air hoses *before* you have a refinish problem.
