

Auto Body Supply, Inc.

DOUG KLEIN Receives Commercial Technical Representative Certification

AUTO BODY SUPPLY is proud to announce that **DOUG KLEIN** has completed the **PPG Certified Commercial Technical Program** & is only 1 of 4 in the State of Nebraska. This exclusive training is a rigorous professional program

designed to identify & certify individuals with the most advanced commercial product and equipment technology knowledge and skill sets in the industry. The training includes a 2 day hands-on evaluation at the **PPG** Training Center in Kansas City. There are currently only twenty six (26) certified commercial representatives nationwide. **Congratulations Doug!**

Founded in 1969 **Dynabrade** has earned a reputation for excellence and a position of leadership in the innovative design

and manufacturing of unique automotive aftermarket portable abrasive power tools and related accessories. With over 300 high-quality tools in the product line, there is a tool to help you save time and money. We can help you chose the right product to help you with your grinding to finish sanding. Cooler Temps are Here!

Fall weather arriving means you need to be aware of the temperature affect on the paint process. Metal and air temperature has a big effect on dry and cure times. So use the correct temp reducer and check paint vescosity. A cold mix room will have a huge effect on the paint mixing process. Check sheet metal temps before spraying if it has been setting out side in the cold. Below is a good guide to go by to help you have a smooth transition into the colder winter temps.

"THE 15 DEGREE RULE"

ESTABLISHES 70 DEGREES AND 50% RELATIVE HUMIDITY AS THE STANDARD TEMPERATURE FOR PAINT DRYING TIMES AS PER LABEL INSTRUCTIONS.

FOR EVERY 15 DEGREES **ABOVE** 70 DEGREES, DRY TIME & POT LIFE IS CUT IN HALF!

FOR EVERY 15 DEGREES **BELOW** 70 DEGREES DRY TIME & POT LIFE IS DOUBLE!

NOTES TO REMEMBER: **THIN** PAINT DRIES FASTER THAN **THICK** PAINT!

TWO COMPONENT CROSS LINKING STOPS **BELOW** 60 DEGREES!
