## OSHA INFORMATION

Last month we talked about OSHA visiting Nebraska shops. We have had a lot of comments and questions on what to do to be compliant with OSHA regulations.

We would recommend working with **Nebraska Workforce Development**. They have a good web site for information or will send somebody out to review your facility and make any recommendations for you to be OSHA compliant. We have worked with them in the past and they have been helpful for us to keep compliant in our store. [www.dol.nebraska.gov](http://www.dol.nebraska.gov) 402-471-4717

### Soft Strike Aluminum Conversion Kit

With many vehicles now using aluminum, including the new Ford 150 body, using everyday steel tools can cause galvanic corrosion on aluminum components. Maximize your existing steel body tool investment by using **Soft Strike Aluminum Covers** to also work on aluminum body components. Ask your **ABS** salesman about this new product.

## I-CAR TRAINING

### NEW10 VEHICLE TECHNOLOGY & TRENDS 2010

11/4/2014 6:00 PM

Southeast Community College Milford, NE
