Hail season is coming!

Be ready with the Glue Pull Repair process. Repair steel and aluminum, by gluing on a tab and pulling the dent or crease without damaging the OEM paint. Ask about our Keco Products and for a demonstration from one of our sales staff.

Why Wear a Paint Suit?

While it is tempting to not wear your paint suit in the booth in an attempt to stay cool, you could be jeopardizing a flawless finish. Cotton shirts can trap sanding dust and other contaminants that can track into your spray booth. Paint suits not only protect your skin from overspray, but they are also designed to be anti-static, repelling dirt and other pollutants that can cause defects in your finish, such as dirt or even cratering. **ABS** offers paint suit options. Wear your paint suit and keep your paint jobs clean and your work productive! Ask your **ABS** rep for details.

Recertification is Essential

Training is essential to stay on top of new products, tools, and processes that are part of the growing complexity of new OEM finishes. And as the OEM's continue to differentiate themselves with more and more unique finishes, it is critical that a painter continue to grow their skillset by becoming recertified every 2 years. Not only does this recertification allow a painter to stay current with the latest Refinish techniques, but it is also required to maintain a collision center's certification as well as a **PPG**-backed paint guarantee.

PPG's Technician Certification Program includes 5 levels: Blue, Bronze, Silver, Gold and Master levels. When a technician follows this program and becomes recertified every 2 years, they strengthen their own skills while maintaining their shop's competitive advantage. **PPG's** recertification is now available to complete online or in a live class taught by our **ABS Distributor Tech Reps**. Ask one of our sales staff on how to get started.

All for one, and one for all. The Delfleet One® paint system is easy to mix and apply, simple to learn, and available in basecoat, direct gloss and matte finishes. Ask your **ABS** rep for more information.
