

The Philosophy behind our Business Relationship drives Customer Service

Our mission is to build customer loyalty through innovative services, product superiority and adding value to the sale relationship. We go beyond simply handling the products customer want by also providing the knowledge, service and tools they need to build a successful business. Because customers rely on **AUTO BODY SUPPLY** to help them become more profitable, we work to make their jobs easier.

We keep customers informed about trends and new products. We excel at prompt customer delivery.

Through our alignment with industry leaders such as PPG, our customers have the opportunity to tap into world-class training, product and application resources, color matching tools and more.

We have three Nationally Certified Distributer Technicians on our staff to provide our customers technical support, product and productivity improvement information at the highest level. We focus on Honesty, Integrity and Quality. No high pressure sales pitches or gimmicks. We truly believe that our success depends upon our customer's success.
