Dust Free

Automotive Vacuum Systems

An investment in a Dust Extraction System can have an impact on your entire business.

Here's how:

- Dust control during sanding operations in both the body and paint departments;
- Fume extraction during welding operations;
- Easier clean up in the detailing department;
- A cleaner office area;
- Extended sandpaper life (30 percent is a number the industry seems to agree on);
- Extended technician life. Well ... maybe not. But it *will* improve the health of those hard-to-replace technicians.
- A measurable improvement in overall shop cleanliness and worker morale.
- The purchase of a dust extraction system also makes a statement to your employees that you care enough about them to install a piece of equipment that has real benefits for them.

Check with **Auto Body Supply** for more information on a vacuum system or for a free demo.

**TRAINING at
SCC MILFORD**

- **Deltron Recertification April 25th**
- **Envirobase HP Recertification April 26th**

Check with our staff if you would like to attend. RSVP soon. Space is limited.
