Cooler Temps are Here!

Fall weather arriving means you need to be aware of the temperature affect on the paint process. Metal and air temperature has a big effect on dry and cure times. So use the correct temp reducer and check paint viscosity. A cold mix room will have a huge effect on the paint mixing process. Check sheet metal temps before spraying if it has been setting out side in the cold.

OCTOBER I-CAR TRAINING

SSS01 – Structural Straightening Steel

Oct 5, 2017 6:00 PM
