Prevost

Safety Push Button Couplers

With a single push of a button, Prevost safety couplers vent pressure then safely release the plug eliminating risk of personal injury or vehicle damage from hose whip.

- Composite coating to prevent vehicle scratches.
- Leak free connections
- Push button design

Protecting Yourself from Redo's

Sometimes we get into a zone and everything is going really smooth and then all of a sudden there is a problem. More than likely we have skipped or changed a repair process.

It is important that we don't forget the fundamentals.

Something as simple as not washing the vehicle or panels to be worked on before starting can cause a paint problem.

Take the time to review your basic fundamental procedures before you have a redo.

New Computer System

Auto Body Supply is in the process of implementing a new computer system in order to better serve our customers. The new system will provide you with a wider variety of reports to help your business.

This implementation may result in partial statements in the next month or two, (one statement from the old system and one from the new). If this occurs, we will provide you with additional details and explanations. We appreciate your patience with us while we go through this transition. Thank you!
