PPG launches “*Paint It*” a new online tool for color identification and selection

A fast, reliable tool to find the most current color information, *Paint It* is the latest PPG innovation for color selection and identification. The web based application provides a simple search feature to identify the right color for your next vehicle repair. Digital representations of body and non-body automotive colors are now available—onscreen to aid in the color visualization process. Images and data are linked together for quick and easy search results. Once the correct color is identified, you are one click away from formula retrieval via the Online Color Formulation tool. *Paint It* is accessible through www.ppgpaintit.com.

Features

- Images and data are linked together for quick and easy search results
- Search by Year, Manufacturer, Model, Color Family, Finish Effect or Usage. 2009-2012 vehicle information is available.
- Domestic as well as Import manufacturers in one location
- Various graphical views to sort and organize the information for fast color identification
- Web based application with the latest information 24/7
- Easy access to color formulations through ppgrefinish.com (password required for formula lookup only)

NEW “Euro Trim Black”

39003 EURO TRIM BLACK is a new addition to the **TRIM PAINT** offering. **39003** is a satin black coating formulated for maximum coverage and matches the color of many of today’s foreign model automobiles.
