NOVEMBER NEWSLETTER 2015

Advanced Estimating Class a Success

The PPG Advanced Estimating Class sponsored by ABS on September 29th & 30th in Lincoln was a success. Students were trained on real world estimating processes and provided with the training and instruction to maximize their estimating processes. PPG instructor Mark Bono directed the training to include best estimating practices, not-included operations, direct repairs, and much more. Students ended the two day training with the tools to write a more accurate estimate, perform a quality repair process and most importantly, to increase their profits. This was the second PPG estimating course offered in the Omaha/Lincoln area. We strongly encourage shops to take advantage of training opportunities in order to stay abreast of the current processes in our industry.

ACCUSPRAY Spray Gun System with PPS

Meet the all-in-one disposable solution for mixing and measuring, filtering, spraying (in any direction!) of primer, sealer, base and clear coat.

The Accuspray Spray Gun System with PPS combines the easy maintenance and simplicity of our Accuspray spray guns and with the solvent-sipping, material-saving, rapid-clean-up convenience of PPS that pros love. The kit contains the Accuspray ONE Spray Gun, and several atomizing heads that can handle coatings from primers to clear coat, hard cup and retaining ring, disposable lids and liners, and more. **ONE gun meets all your spraying needs.**
