At **AUTO BODY SUPPLY** we are proud of the quality products & support that we provide to our customers. We are committed to providing **QUALITY PRODUCT & SERVICE, TECHNICAL SUPPORT and PRODUCT TRAINING**, while building strong working relationships.

With **ABS** you have a partnership dedicated to your success. Thank you for your business and we look forward to helping you in the future.

Matte Finishes

In the past few years, Matte finishes have grown in popularity among refinishers and OEM designers.

SU4985 and **SLV4985** Universal Matting Agents are designed for use across product lines with compatible **PPG** topcoats. Motor manufacturers have been introducing various degrees of gloss in basecoat clearcoat finishes for bumper, clad and trim colors.

There are five levels of gloss available for clearcoats ranging from flat to semigloss. Gloss levels are represented as FC01-FC05. The level of **SU4985** or **SLV4985** in the formula will determine the degree of gloss. The correct ratios for these gloss levels can be found in the TouchMix® Computer System or on the product information sheet.

 **PLATINUM DISTRIBUTOR**

UNDER COATS

Using the appropriate color undercoat can improve the number of coats until hiding is achieved thus saving time and material. **PPG** has designed a chromatic undercoat system for use under their topcoats. When a color is accessed on one of **PPG's** color formulation systems, along with the recipes for the color there is a recommendation for the undercoat color. These are listed G1 (white) thru G7 (black) and everything in the middle a shade of gray G2-G6. Shades of gray (white thru black) are easier to hide than red, blue or green undercoats. Fewer coats of color till hiding means less money spent on the most expensive layer of the finish, color! Plus you save time in not applying 4 coats or more with flash times in between. **PPG** now has spray out cards for each separate undercoat color G1-G7 so it will be easier to get a color match when doing a spray out.

Penske Racing driver, Helio Castroneves, will be racing in the **PPG**-themed Indy car August 4th at the Honda Indy 200 at Mid-Ohio and September 1st at the Grand Prix of Baltimore.
