Commercial Performance Coatings

When it comes to selecting a coatings system for diverse applications, you can depend on **PPG Commercial Performance Coatings** to offer the right combination of products and technologies that meet your specific application and productivity requirements. **PPG** is uniquely capable of offering a full line of coating technologies—from economical alkyds and epoxies to the latest high-performance, low-VOC urethanes, powder coatings and other proprietary technologies.

For a cost effective paint for your tractor, car trailer or even your car or truck frame and wheels check on our CPC line of coatings.

It really is that simple, the finish need not be compromised; remove the minor runs and imperfections by using Shim Mask to protect the surrounding area.

Ideal For:

- Paint runs.
- Imperfections.
- Minimizing area when sanding paint filled chips or scratches.

Advantages:

- Stainless steel 304 provides hardness for re-use.
- Chemically etched shapes eliminates burred edges.
- Choice of four stencil shapes.

Local Painter Training A Valuable Service For Our Customers

Each year, **PPG** & Auto Body Supply customers have the opportunity to go through certification and re-certification painter training classes held locally at SCC Milford. Painters get updated product training required for the **PPG** Life Time Guarantee.

After polling painters that use other brands, it was surprising to find how few had any recent manufacturer training. The biggest reason was the lack of class dates and the travel time and cost associated with the class.

Independent studies have shown that automotive painters that receive regular training are an average 25% more productive and have an average of 15% fewer re-do's.

If your painters have not received current training, contact us.

“Your life does not get better by chance, it gets better by change.” –Jim Rohn
