## STANDARD OPERATING PROCEDURES

**Standard Operating Procedures** (SOP's) are a critical step in maintaining an efficient & profitable body shop repair business.

- 1) Why have SOP's?
- 2) What are SOP's?
- 3) Examples of SOP's

Check out the SOP information on our website

[www.autobodysupplylincoln.com](http://www.autobodysupplylincoln.com)

Develop your own SOP's and insure your shop is running efficiently, the way you want it to be!

### Jody Perewitz - Bonneville's Fastest Woman

Jody Perewitz set the bar when it comes to hot bikes and blazing speed, setting the record as the first woman to go over 200mph on an American-make V-Twin at the Bub Motorcycle Speed Trials at Bonneville Salt

Flats. She and her dad, legendary builder and King of Flames, Dave Perewitz designed her bike in a pink and purple paint scheme done with **PPG** finishes.

**Pete's Pointers**  
Technical tips from Pete the Painter

## Tech Tip #12

Use **PAINTMANAGER**® software to mix the right G-Shade formula. You can mix the correct G-Shade formulas in **ENVIROBASE**® High Performance Waterborne system or **Deltron**® DBC Solventborne system, to get a groundcoat suitable for low-opacity colors, enabling you to get a great color match.

### Have you noticed how **VIBRANT** the colors are of today's new cars?

Manufacturers are using exotic colors to differentiate their brands in the market. Pigments in these colors are very vibrant, highly chromatic, and often translucent. Toyota 3R3, Chrysler PB8, and Kia XMJ are a few examples. When performing a repair on these types of colors, it is important that the painter use the correct G-shade sealers or basecoat ground coat to achieve the best possible match. **PPG's PAINTMANAGER**® software provides the correct G-shade recommendation on every formula. As a painter, pay close attention to the G-shade recommendations and re-creating these striking new OE colors will be a snap.
