Body Shop Survival Tips

Weathering the Pandemic

- Utilize online training & virtual trade shows to stay abreast of current industry information.
- Adhere to manufacturer's vehicle guidelines for disinfecting & carefully sanitizing each vehicle as it arrives and is returned.
- Follow state & local guidelines to safely remain open.
- Clean your shops thoroughly and frequently.
- Manage your team's health and safety – practice social distancing, wear masks, wash hands and surface areas frequently.
- Post a sign in your front office confirming that your shop is following heightened sanitation and disinfection procedures for customer and employee's safety.
- Adjust estimating processes to minimize contact. Let customers know an estimator can meet customers outside to discuss the job, if requested.
- Social media has served as another great tool. Shops have been making sure customers know they are open for business by staying active online and informing the public of any preemptive measures being taken by the facility.

Change is here. We can fear it or embrace it, but we cannot run from it.
